DATA STORIES ON-DEMAND

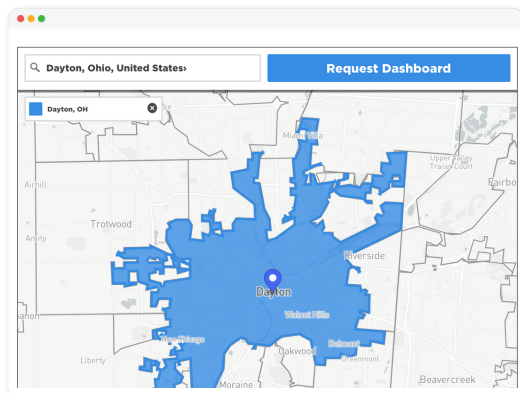

Connect data to people at the press of a button.

Get key data into **more hands**.

Every person in every place deserves affordable housing, education, and healthcare. Press enables you to deliver data to the people who can make it happen **in seconds**.

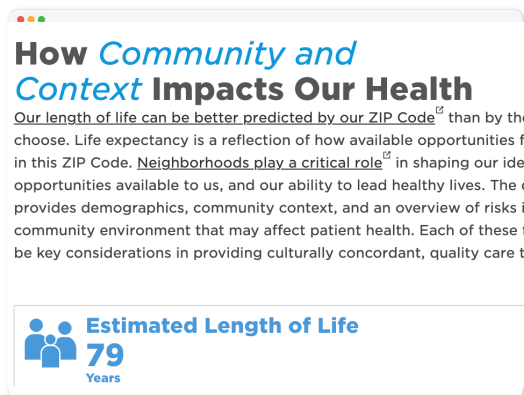

- 40+ data sources, 1.4+ billion data points
- Save time on data collection, reporting, and storytelling

Enable change at **local levels**.

We can make a stronger impact when we work together. Send on-demand data reports and dashboards to **local partners** in every community to create a shared understanding of need and opportunity.

- 16 levels of geography for granular analysis
- Compare geographies alongside each other

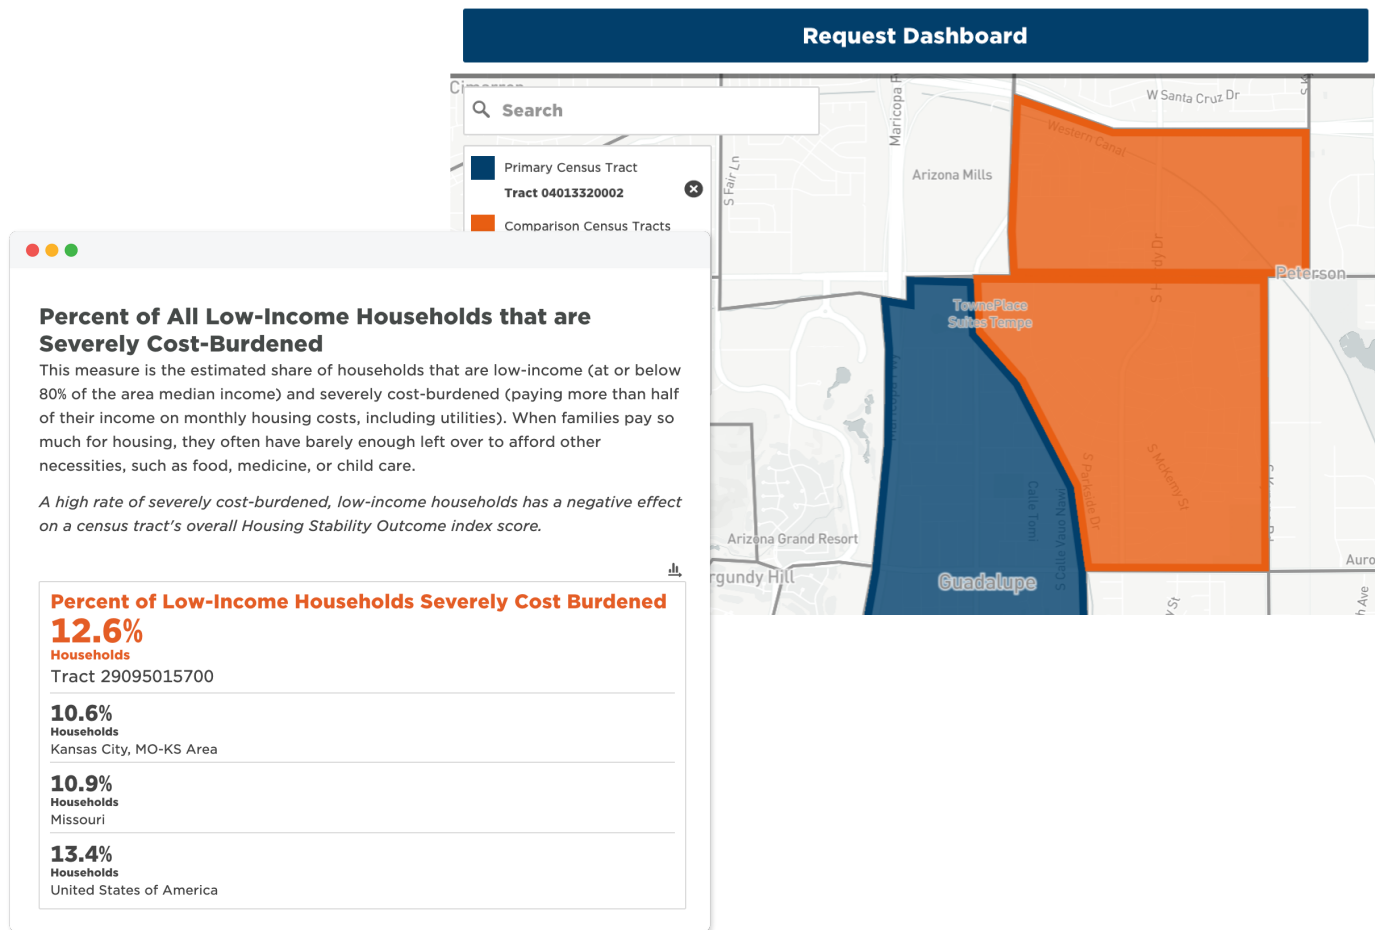

Be a **mission-critical** resource.

Lead with organizational data expertise that's centered on impact, equity, and accessibility.

Build relationships with users and understand paths to measuring and expanding your impact.

- Align resources through shared understanding
- Capture data points to analyze usage

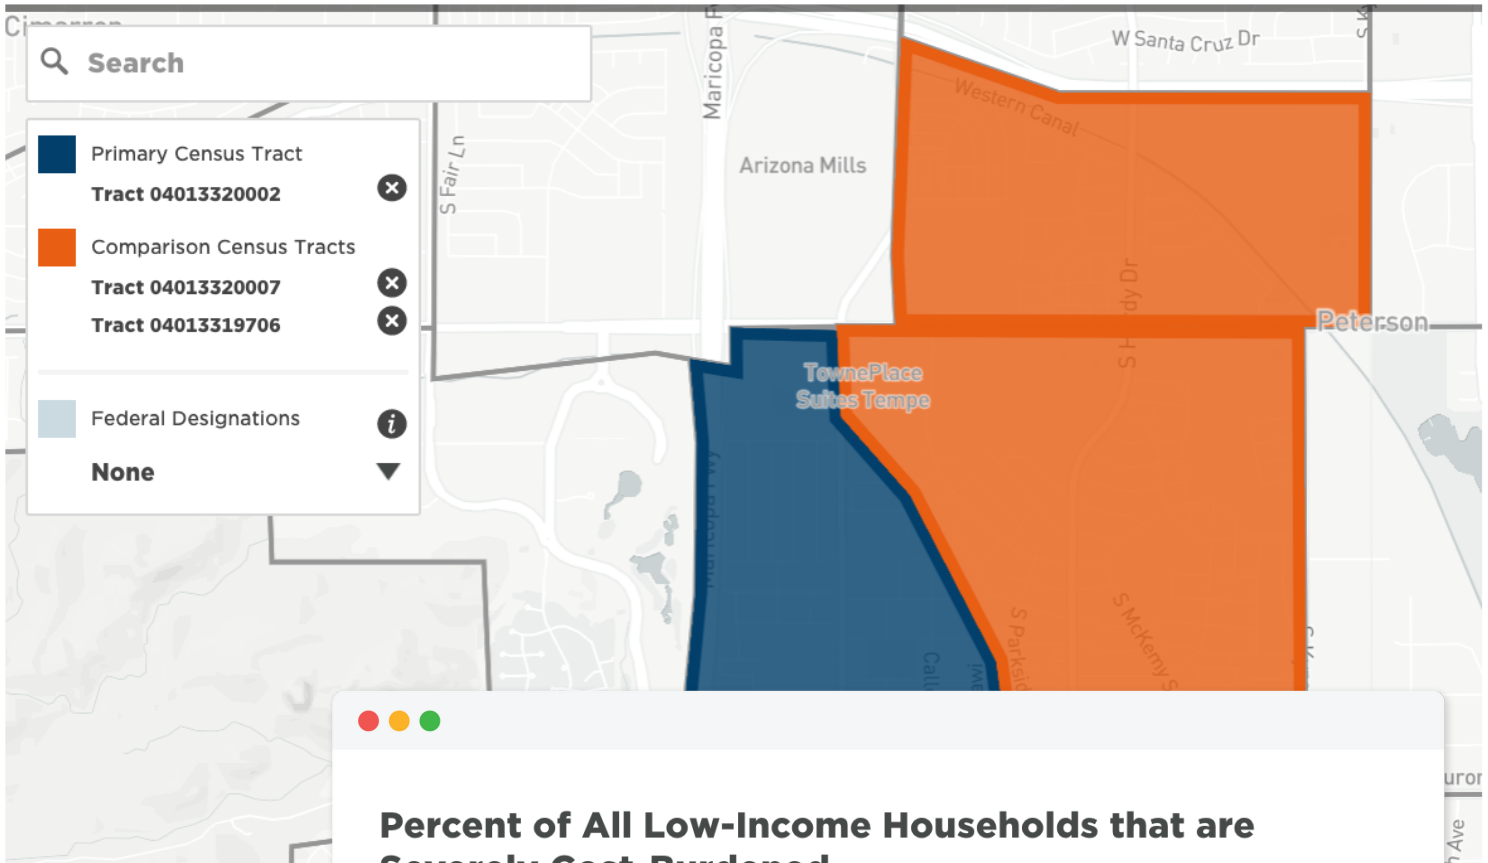

"mySidewalk really democratizes data ...

...They don't just publish information, they help you understand it. [Press] has allowed us to operationalize community data in a way that's accessible to everyone who reviews it.

Percent of All Low-Income Households that are Severely Cost-Burdened

This measure is the estimated share of households that are low-income (at or below 80% of the area median income) and severely cost-burdened (paying more than half of their income on monthly housing costs, including utilities). When families pay so much for housing, they often have barely enough left over to afford other necessities, such as food, medicine, or child care.

A high rate of severely cost-burdened, low-income households has a negative effect on a census tract's overall Housing Stability Outcome index score.
