

Gain insights into a **CRR STATE OF MIND.**

CRAIG 1300™ State generates community risk assessment insights, gathering critical information regarding the safety of your state and counties, all aligned with NFPA® 1300.

Analyze the most relevant, state-specific, high-quality data indicators in seconds.

Access all of the critical community data you need to identify capacities and opportunities to create the most impactful and tailored risk reduction plans.

Build data-driven cases for CRR budgets, personnel, initiatives, and programming.

Take the lead on developing stronger standards for data transparency and reporting to support collaborative partnerships and advocate for funding across your state.

Create compelling visualizations without the need for data expertise.

That's right, you can empower anyone on your team to use CRAIG 1300™ State to build engaging reports with maps and charts.

SET A NEW STANDARD FOR SAFETY IN YOUR STATE.

With options built to fit your needs and budget, CRAIG 1300™ State generates the most valuable and relevant insights aligned with NFPA® 1300 in seconds.

Quickly and easily identify unique data characteristics of your counties and state, including geospatial analytics and complete with automatic updates.

Access everything included in CRAIG 1300™ State PRO, plus NFIRS data and 5 additional custom indicators to support your state's public safety programs and needs with data-driven CRR plans.

Build fully customized dashboards featuring self-selected critical elements unique to your state's risk reduction initiatives—even equip state and local agencies and community partners to produce dashboards on demand.
