

# ACCESS EVERY PARCEL

Explore trends and create data stories about real estate, land use, zoning, property values, taxes, and so much more.

**EXPLORE 100+ MILLION PARCELS IN THE US**

**MEASURE 750+ CRITICAL PROPERTY INDICATORS**

**ANALYZE WITH 2+ BILLION COMMUNITY DATA POINTS**

# Glad you asked!

- **What is property data?**

Property data details the physical structures of our communities. You will find information about land, commercial, industry manufacturing, and residential properties. You will also find details on lot and building sizes, property values, and tax amounts.

- **Why does mySidewalk's platform include property data?**

mySidewalk already has data indicators to help understand and describe the people who make up our community. Property data helps us describe the built environment those people live and work in. When we intersect information about people and places, we can help transform the world around us.

- **Is property data available anywhere else?**

Harvesting property data from each county in the country and merging it is an expensive, complex process. There is no other searchable database of these property data measurements nationwide, and mySidewalk has them for 16 political and social boundaries across 6 years!
